

Job Safety Analysis Training

Employers are required to identify workplace hazards and protect their employees from harm. Furthermore, employees have the right to know about the hazards in their jobs and how to protect themselves. One way to accomplish this is to conduct a Job Safety Analysis (JSA) on any tasks that concern the safety of employees. This course has been designed to help you meet all regulatory and government requirements including the Alberta Occupational Health and Safety Code.

This **one-hour** course is part of the THRIL certificate program series, developed by Gemini and well-known, highly respected industry professionals. THRIL certificates are designed to easily and inexpensively obtain essential training that leads towards recognized certification and qualifies for compulsory certification maintenance points to preserve ROH and CRSP designations.

On completion of this course you will be able to:

- Describe the purpose and benefits of conducting a Job Safety Analysis (JSA),
- Identify tasks and their component steps suitable for a JSA,
- List the steps involved in conducting a JSA,
- Identify those who should be responsible for conducting a JSA,
- List the types of jobs for which conducting a JSA would be applicable,
- Describe how to conduct a JSA,
- List some examples of hazards and unsafe work practices, and
- Explain methods in which hazards can be controlled.

THRIL assessments are also available for all THRIL courses ideal for learners that wish to challenge the course for recertification purposes.
