

General Fire Safety Training

Online!

The risk of fire is one of the greatest threats to health, safety, property, and the delivery of services. Fire prevention and protection programs promote an approach to fire safety and prevention that includes responsibilities for all employees regarding the reduction of fire hazards at their workplace. This course has been designed to help you meet all regulatory and government requirements including the Alberta Occupational Health and Safety Code.

This **1½ hour** course is part of the THRIL certificate program series, developed by Gemini and well-known, highly respected industry professionals. THRIL certificates are designed to easily and inexpensively obtain essential training that leads towards recognized certification and qualifies for compulsory certification maintenance points to preserve ROH and CRSP designations.

On completion of this course you will be able to:

- Understand the legislative guidelines related to fire prevention and protection,
- Describe the responsibilities of workers, supervisors, and managers related to fire prevention and protection,
- Identify the elements that can cause a fire,
- Classify fires and proper fire extinguisher use,
- List the basic elements of fire detection,
- Describe proper safety techniques for dealing with a fire,
- Identify the process for fire emergency response planning,
- Identify the elements of a fire prevention program,
- Describe how to safely evacuate a burning building,
- List the factors that contribute to the effective use of fire extinguishers, and
- Describe how to safely evacuate a burning building.

THRIL assessments are also available for all THRIL courses ideal for learners that wish to challenge the course for recertification purposes.
