

## Pre-Trip Vehicle Inspection

*Online!*

A pre-trip inspection is required by law on vehicles registered for 11,794kg and over when operating in Alberta, and at 4,501kg or more if operating outside of Alberta. Failure to conduct the pre-trip inspection could result in costly delays. In this course, you will be presented with information on 2 categories of defect, identifying defects, and inspection and reporting procedures.

This **two-hour** course is part of the THRIL certificate program series developed by Gemini. THRIL certificates are designed to easily and inexpensively obtain essential training that leads towards recognized certification and qualifies for compulsory certification maintenance points to preserve ROH and CRSP designations.

### On completion of this course you will be able to:

- Identify when an inspection is required,
- Fill out an inspection report,
- Identify the difference between a "defect" and a "major defect",
- Identify defects in the 23 items you will inspect on a vehicle,
- Identify whether a problem is a "defect" or a "major defect",
- State how many inspection locations there are for truck and tractor trailers,
- List which items should be inspected at each inspection location, and,
- List the order in which these items should be inspected.

THRIL assessments are also available for all THRIL courses ideal for learners that wish to challenge the course for recertification purposes.
