

Industrial Hygiene Hazards *Online!*

Industrial Hygiene is the discipline of anticipating, recognizing, evaluating and controlling health hazards in the working environment. The objective is to protect worker health and well-being, and to safeguard the community at large.

Proper implementation of the industrial hygiene program protects personnel from chemical, physical, and biological hazards.

This 2 hour course is part of the THRIL certificate program series, developed by Gemini and well-known, highly respected industry professionals. THRIL certificates are designed to easily and inexpensively obtain essential training that leads towards recognized certification and qualifies for compulsory certification maintenance points to preserve ROH and CRSP designations.

On completion of this course, you will be able to:

- Describe industrial hygiene practices,
- Describe the regulatory framework pertaining to industrial hygiene,
- Describe the effects of the most common biological, chemical, physical hazards,
- List ways to evaluate the most common biological, chemical, physical hazards, and
- Identify ways of controlling and preventing the most common biological, chemical, physical hazards.

THRIL assessments are also available for all THRIL courses ideal for learners that wish to challenge the course for recertification purposes. Successful completions of assessments do not qualify for maintenance credits.
