

Health and Safety Program Basics

Online!

Accidents and inefficient procedures can be very expensive and the health and safety program you develop can help you to reduce expenses by implementing safe practices in your workplace. In this course you will be presented with a description of the elements of a health and safety program and guidelines for implementing the elements of that program. This course was developed to aid employers, contractors, and workers meet the requirements of the Occupational Health and Safety Regulations.

This **two-hour** course is part of the THRIL certificate program series, developed by Gemini and well-known, highly respected industry professionals. THRIL certificates are designed to easily and inexpensively obtain essential training that leads towards recognized certification and qualifies for compulsory certification maintenance points to preserve ROH and CRSP designations. University of Calgary students completing a total of 45 hours or more training will be credited 30 hours of elective course credit toward the U of C Health, Safety and Environmental Certificate program.

On completion of this course you will be able to:

- Describe the place of a health and safety program within your operational risk management system,
- List the benefits of an occupational health and safety program,
- Describe the components of an occupational health and safety program,
- List the guiding principles that an occupational health and safety program are built upon,
- Describe the purpose of having written occupational health and safety rules in your policy,
- List ways to effectively communicate your rules and policies,
- Describe the purpose of occupational health and safety committees,
- Describe when to perform a new worker orientation,
- List the types of inspections,
- Describe the importance of emergency response plans, and
- Describe the investigation procedures for incidents and accidents.

THRIL assessments are also available for all THRIL courses ideal for learners that wish to challenge the course for recertification purposes.
