

Wildlife Awareness

Online!

If you are working in the North American wilderness, there is a possibility that you may encounter a wild animal. This course will teach you how to identify wild animals, reptiles, insects, and plants, wild animal behaviors and characteristics, how to detect a wild animal in the area, steps to take if you encounter a wild animal, and how to prevent an encounter.

This **three-hour** course is part of the THRIL certificate program series, developed by Gemini and well-known, highly respected industry professionals. THRIL certificates are designed to easily and inexpensively obtain essential training that leads towards recognized certification and qualifies for compulsory certification maintenance points to preserve ROH and CRSP designations.

On completion of this course you will be able to:

- Identify and explain wild animal behaviors or characteristics,
- Explain how you can tell if there is a one wild animal in the area or in your surrounding,
- Describe what you should do if you encounter a wild animal,
- List steps that can be taken to prevent a snake bite,
- Identify common types of insects like mosquitoes, bees and wasps,
- Describe common features of a black widow, brown recluse, and hobo spiders,
- Describe common features of deer mice and hantavirus,
- Identify tick related diseases such as Lyme disease & Rocky Mountain Spotted Fever, and
- Identify poisonous plants such as Poison ivy, Devil's Club, Stinging Nettle and Western Water Hemlock.

THRIL assessments are also available for all THRIL courses ideal for learners that wish to challenge the course for recertification purposes.
