

Maintenance Management Solution

Organizations manage a large spectrum of assets:

Buildings

Equipment

Fleet

Workforce

Many organizations track their assets by paper or through spreadsheets:

- 📄 Paper is often plagued with inaccuracies or gets lost
- 📊 Spreadsheets often limit multiple user access (version control)
- 📅 Difficult to track upcoming preventative maintenance schedules with

Most Computerized Maintenance Management Systems (CMMS) suffer two major downfalls:

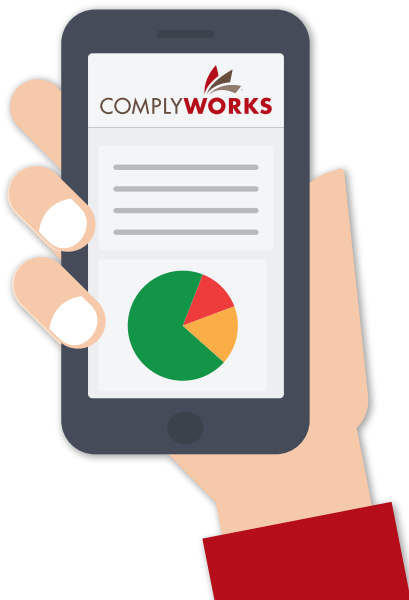

- 💰 They are very expensive
- 🖱️ They are hard to use

☁️ **Imagine if you were able to:**

Increase the life of assets, track maintenance costs & budgeting, access information anywhere/anytime, improve productivity, prevent asset failure & reduce costly downtime and capitalize on lower insurance premiums.

ComplyWorks Maintenance Management Solution

ComplyWorks has streamlined the process – making it easy to use – but still maintaining key Computerized Maintenance Management System functionality at an affordable price. ComplyWorks' Maintenance Management Solutions are organized into categories so you can choose the level that meets your needs:

🔧 **Asset Monitoring Solution** – This solution is for those who don't need a full on Maintenance Management Solution. Perhaps your company contracts out all of their maintenance, this solution provides you with preventive maintenance scheduling along with alerts and notifications as to when the service is required. Service reports can then be uploaded into our system for proof of service.

🔧 **Maintenance Management Solution** – This solution provides a full on maintenance management solution with an asset registry, asset maintenance scheduling, alerts and notifications, work order tracking, secure storage documents and a reporting package that will give you the necessary info needed to make informed decisions regarding your assets from purchase to retirement.

⚙️ **ComplyWorks Services** – ComplyWorks can also provide you with additional services on a quotable basis should you require help getting your maintenance management program up and running, including all of your data input if needed. We can also write all of your maintenance procedures for you and incorporate them into a job plan/safety plan, if you do not already have any in place.
